NOTE 2- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – (continued)

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires the Company's management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Depreciation

The cost of computers, furniture and equipment is depreciated over the estimated useful lives of the related assets of 3 to 7 years on a straight line basis.

Recent Accounting Pronouncements

The Company does not expect any recent accounting pronouncements to have any material impact on its financial condition or results of operations.

NOTE 3 – FAIR VALUE OF INVESTMENTS

Fair value is an estimate of the exit price, representing the amount that would be received to, sell an asset or paid to transfer a liability in an orderly transaction between market participants (i.e., the exit price at the measurement date). Fair value measurements are not adjusted for transaction cost. Fair value measurement under generally accepted accounting principles provides for use of a fair value hierarchy that prioritizes inputs to valuation techniques used to measure fair value into three levels:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities.

NOTES TO FINANCIAL STATEMENTS

NOTE 3 – FAIR VALUE OF INVESTMENTS (continued)

Level 2: Inputs other than quoted market prices that are observable, either directly or indirectly, and reasonably available. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability and are developed based on market data obtained from sources independent of the Company.

Level 3: Unobservable inputs. Unobservable inputs reflect the assumptions that the Company develops based on available information about what market participants would use in valuing the asset or liability.

An asset or liability's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Availability of observable inputs can vary and is affected by a variety of factors. The Company uses judgment in determining fair value of assets and liabilities and Level 3 assets and liabilities involve greater judgment than Level 1 and Level 2 assets or liabilities.

The following are the Company's investments owned and securities sold short by level within the fair value hierarchy at December 31, 2010.

	Fair Value	Fair Value Hierarchy
Assets		
Stock	\$ <u>149,743,824</u>	Level 1
